

VENTILATION / FANS

AIR TRANSFER KIT NO.1

The basic single point kit is suitable for transferring heat to a bedroom or similar sized room. The fan is a quiet centrifugal type. Optional is a fan speed controller.

As per all our kits, they are easy to install and only need a qualified electrician for mains connection.

All our kits also have the ability to be extended where additional ducting lengths are required.

CONTENTS - KIT 1

Code 864101 HF

2 off - 3 metre lengths 150mm Insulated Flexible Duct

2 off - 150mm Unijet Ceiling Diffusers

1 off - 150mm R2E 190 Centrifugal Fan (Low Profile)

VENTILATION / FANS

AIR TRANSFER KIT NO.3

This is also a two point kit but has a more powerful fan for those larger rooms, ie two bedrooms or where you need to transfer the heat over a greater distance. Optional is a fan speed controller.

A qualified electrician needs to connect the kit to mains power, other than that the kit can be installed by a home handyman.

CONTENTS - KIT 3

AIR TRANSFER KIT NO.4

This is our largest kit available. It is capable of transferring heat to three rooms. This could be bedrooms, study, bathrooms etc. Optional is a fan speed controller.

Also available is a zoning option that would allow you to heat each zone one by one as you require it. This kit also requires a qualified electrician to connect it to mains power, other than that a home handyman can install it.
