# Kwik-Flex

## Commercial Installation

## Individual Kwik-Flex Support

## Domestic Installation

## Box of Kwik-Flex

Kwik-Flex is Commonly used hanging products like 25mm blue strap or metal perforated strapping with or without various mesh products, can strangle the flexible duct or even cut the outer jacket of the flexible duct. This leads to poor performance of your system, increasing running costs.

Studies in both Australia and the USA show that there can be up to 40% thermal energy losses in flexible ducting due to poor installation practices.

Kwik-Flex ensures the efficient operating of your ducted air-conditioning, heating or evaporative cooling system.

## Benefits of Kwik-Flex

- UV Stable
- High tear strength
- Cost effective
- Saves time and labour costs
- Guaranteed for 10 years
- Lightweight
- Can be removed and reused
- Extremely easy to use / install
- Provides a professional installation
